KANAZAWA HIRONOBU****(54) ELECTRODE FOR ELECTROPLATING****(57) Abstract:**

**PROBLEM TO BE SOLVED:** To provide an electrode for electroplating which makes the fitting to a body to be plated easy and permits the power supply to an isolated pattern.

**SOLUTION:** The electrode is constituted to apply the electroplating to the body 2 to be plated, and is provided with a first member 11 in contact with one surface of the body to be plated and a second member 12 in contact with the other surface of the body to be plated. The first member is connected to a power source 14, and the first member and the second member are magnetically attracted to each other via the body to be plated.
